

Add a new feature - Failure

Date : 2015.10.18

Tags :

Made by : Asutosh SATAPATHY

Goal : To add a (random) feature to the application.

Procedure :

1. Created a new vector of features.
2. Added the feature eccentricity to it.
3. Added to the Random Forest.
4. Tested results

Results :

1. The application executed successfully.
2. This experiment was a failure as the runtime of the application increased significantly.
3. Came to the conclusion that this is not the right approach. Instead of creating a new vector, it is better to append to the existing feature vector.
